Personal Statement

Self-taught full-stack developer focused on building blazing quick, pixel-perfect single-page apps, websites and applications. Energetic, highly motivated, a good communicator and with a good knowledge of many buzzwords. Ready to join a team of developers, learn, contribute and solve complex problems.

Technologies

HTML, CSS, JavaScript, React, C#, PHP, WordPress, Angular, .NET Core, MySQL.
REST API, CSS Flexbox and Grid, SPA.

Projects

WooCommerce shipping plugin

[Github repository](#)

WordPress WooCommerce plugin for Omniva terminal shipping option.

- Allows users to choose what terminal to ship to.
- Uses Omniva API to acquire terminal locations.
- Caches terminal locations for 24 hours.

Mobite website

[Github project](#)

University semester project with a team. Akinator like questionnaire to help non-tech savvy users in choosing a smartphone that fits their needs.

- Users can answer simple questionnaire to get a smartphone recommendation specifically for them.
- Users can register and login. Authentication is implemented with JWT.
- Backend runs on .NET Core 3.1 and uses MySQL database.
- Frontend runs on Angular 9 with custom SCSS styling.
